

Robbery in Skullzton

Problem Solving Framework

Robbery in Skullzton

Performance Task Rubric

Skill: Compare and contrast permutations and combinations.

- | | | | |
|---|---|---|---|
| <ul style="list-style-type: none">• Shows complete understanding of the embedded skill and applies the skill beyond the parameters of the task. | <ul style="list-style-type: none">• Shows complete understanding of required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows some understanding of the required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows limited or no understanding of the mathematical knowledge for the specific skill. |
|---|---|---|---|

Skill: Construct vertex-edge graphs to describe a counting situation.

- | | | | |
|---|---|---|---|
| <ul style="list-style-type: none">• Shows complete understanding of the embedded skill and applies the skill beyond the parameters of the task. | <ul style="list-style-type: none">• Shows complete understanding of required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows some understanding of the required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows limited or no understanding of the mathematical knowledge for the specific skill. |
|---|---|---|---|

Skill: Calculate the total permutations or combinations of (n) objects over time.

- | | | | |
|---|---|---|---|
| <ul style="list-style-type: none">• Shows complete understanding of the embedded skill and applies the skill beyond the parameters of the task. | <ul style="list-style-type: none">• Shows complete understanding of required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows some understanding of the required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows limited or no understanding of the mathematical knowledge for the specific skill. |
|---|---|---|---|

Skill: Apply the Fundamental Counting Principle.

- | | | | |
|---|---|---|---|
| <ul style="list-style-type: none">• Shows complete understanding of the embedded skill and applies the skill beyond the parameters of the task. | <ul style="list-style-type: none">• Shows complete understanding of required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows some understanding of the required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">• Shows limited or no understanding of the mathematical knowledge for the specific skill. |
|---|---|---|---|

Robbery in Skullzton

Performance Task Rubric

Skill: Construct networks to model counting situations.

- | 4: Exceeds | 3: Meets | 2: Approaching | 1: Beginning |
|--|--|--|--|
| <ul style="list-style-type: none">Shows complete understanding of the embedded skill and applies the skill beyond the parameters of the task. | <ul style="list-style-type: none">Shows complete understanding of required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">Shows some understanding of the required mathematical knowledge for the specific skill. | <ul style="list-style-type: none">Shows limited or no understanding of the mathematical knowledge for the specific skill. |
| Planning and Execution | | | |
| <ul style="list-style-type: none">Uses an appropriate and complete strategy for solving the problem.Uses clear and effective diagrams, tables, charts or graphs if required. | <ul style="list-style-type: none">Uses an appropriate but incomplete strategy for solving the problem.Appropriate but incomplete use of diagrams, tables, charts, and graphs if required. | <ul style="list-style-type: none">Uses an inappropriate strategy or application of strategy is unclear.Limited use or misuse of diagrams, tables, charts or graphs if required. | <ul style="list-style-type: none">Works haphazardly with no particular strategy for solving the problem.Does not show use of diagrams, tables, charts, or graphs if required. |
| Persistence | | | |
| <ul style="list-style-type: none">Works hard on the task and doesn't need much helpStudents may extend their thinking beyond the problem and make new connections or make new problems. | <ul style="list-style-type: none">Works hard on the task and only gets help after attempting many strategies.Completes the task and works diligently at the harder parts. | <ul style="list-style-type: none">Can do less difficult parts of the problem with little help.Begins work on the harder parts, but unless help is provided gives up. | <ul style="list-style-type: none">Needs help, even for the simple parts of the task.Gives up quickly, often just wanted the answer giving. |

Planning and Execution

Persistence

Robbery in Skullzton

Performance Task Rubric

Communication:

- There are clear effective explanations for the solutions when prompted to explain or describe.
- Mathematical representations are actively used as means of communicating ideas.
- There is precise and appropriate mathematical terminology used.
- There is clear explanation
- There is appropriate use of accurate mathematical representation.
- There is effective use of mathematical terminology.
- There are incomplete explanations.
- There is some use of appropriate mathematical representations.
- There is some use of appropriate mathematical terminology.
- There are no explanations for the solutions. The explanations cannot be understood or is unrelated to the task.
- There is no use or inappropriate use of mathematical representations.
- There is no use or mostly inappropriate use of mathematical terminology.

Robbery in Skullzton

Critical Thinking/ Creative Thinking Rubric

Ideation/Brainstorming:

- The learner frequently sees the links between unrelated ideas. The learner is able to produce well-developed results that are fresh and new with no support.
- The learner often produces new and unique ideas with little or no support.
- The learner occasionally produces new and unique ideas but only with guidance.
- The learner is unable to produce new and unique ideas without significant guidance and encouragement.

Realization

- The learner actively seeks out and follows through with new ideas or approaches to a problem. The risk of failure is a real possibility but does not constrain the learner.
- The learner is willing to consider and follow through on ideas or approaches to a problem. The risk of failure is a possibility and puts some constraint on the learner.
- The learner considers new ideas or approaches to a problem only with strong encouragement. The risk of failure constrains the learner.
- The learner will not consider new ideas. The learner strictly stays within the constraints of the problem, which ensures that there is little risk of failure.

Communication

- The learner identifies the main idea of the problem with numerous supporting details and examples, which are organized logically and coherently within the Problem Solving Framework with no assistance.
- The learner identifies the main idea of the problem with some supporting details and examples in an organized manner within the Problem Solving Framework with little assistance.
- The learner identifies the main idea of the problem with few details or examples in a somewhat organized manner within the Problem Solving Framework with assistance.
- The learner is unable to identify the key elements of the problem without a great deal of assistance.

Robbery in Skullzton

Critical Thinking/ Creative Thinking Rubric

Process:

- | | | | |
|--|--|---|---|
| <ul style="list-style-type: none">• The learner develops strategies that are insightful and uses logical reasoning to reach accurate results with no assistance. | <ul style="list-style-type: none">• The learner develops strategies that are insightful and uses logical reasoning to reach accurate results with little assistance. | <ul style="list-style-type: none">• The learner develops strategies that are insightful and uses logical reasoning to reach accurate results with assistance. | <ul style="list-style-type: none">• The learner is unable to develop strategies that are insightful and logical without a great deal of assistance. |
|--|--|---|---|

Justification

- | | | | |
|---|---|---|--|
| <ul style="list-style-type: none">• The learner clearly justifies the choices made for solving the problem.• The learner can clearly explain new understandings gained from the problem. | <ul style="list-style-type: none">• The learner justifies the choices made for solving the problem.• The learner can explain new understandings gained from the problem. | <ul style="list-style-type: none">• The learner attempts to justify the choices made for solving the problem.• The learner can explain some things learned in the problem but are not entirely clear about new understandings. | <ul style="list-style-type: none">• The learner shows limited attempts to justify the choices made for solving the problem.• The learner struggles to explain important new understandings gained from the problem. |
|---|---|---|--|

Reflection

- | | | | |
|---|---|--|---|
| <ul style="list-style-type: none">• The learner clearly identifies strengths and weaknesses in their thinking.• The learner clearly identifies improvements that would be made to solve the problem. | <ul style="list-style-type: none">• The learner identifies strengths and weaknesses in their thinking.• The learner identifies improvements that would be made to solve the problem. | <ul style="list-style-type: none">• The learner attempts to identify strengths and weaknesses in their thinking.• The learner attempts to demonstrate the improvements that would be made to solve the problem. | <ul style="list-style-type: none">• The learner shows little attempt to identify strengths and weaknesses in their thinking.• The learner shows little attempt to identify the improvements that would be made to solve the problem. |
|---|---|--|---|

Collaboration Rubric

Participation:

- | | | | |
|--|---|--|--|
| • The group member participated fully and was on task. | • The group member participated and was on task most of the time. | • The group member participated but did not take full advantage of the time to work on the problem/task. | • The group member did not participate and worked on other material during the problem/task. |
|--|---|--|--|

Leadership

- | | | | |
|--|---|--|---|
| • The group member assumed a leadership role by: <ul style="list-style-type: none">• helping keep the group on task• encouraging group participation• posing solutions to the problem• portraying a positive attitude | • The group member sometimes assumed a leadership role in an appropriate way. | • The group member usually allowed other members to assume a leadership role or often attempted to dominate the group. | • The group member did not assume a leadership role or assumed it in a non-productive manner. |
|--|---|--|---|

Listening:

- | | | | |
|---|---|---|---|
| • The group member listened carefully to others' ideas and contributions. | • The group member usually listened to others' ideas and contributions. | • The group member sometimes did not listen to others' ideas and contributions. | • The group member did not listen to others' ideas and contributions. |
|---|---|---|---|

Feedback

- | | | | |
|--|--|---|---|
| • The group member offered detailed, constructive, and specific feedback when appropriate. | • The group member offered constructive feedback when appropriate. | • The group member sometimes offered constructive feedback but sometimes the comments were inappropriate or not useful. | • The group member did not offer constructive or useful feedback. |
|--|--|---|---|

Robbery in Skullzton

Collaboration Rubric

Cooperation:

- | | | | |
|--|--|---|--|
| • The group member treated others respectfully and shared the workload fairly. | • The group member usually treated others respectfully and shared the workload fairly. | • The group member sometimes treated other group members disrespectfully or did not share the workload. | • The group member often treated other members disrespectfully or did not share the workload fairly. |
|--|--|---|--|

Time Management

- | | | | |
|---|--|--|---|
| • The group member completed assigned parts of the problem on time. | • The group member usually completed assigned parts of the problem and did not hold up progress on the problem due to incomplete work. | • The group member often did not complete parts of the problem on time and held up the completion of work for the group. | • The group member did not complete most of the assigned parts of the problem and often forced the group to make last minute adjustments to accommodate missing work. |
|---|--|--|---|

Robbery in Skullzton

Writing in Math Rubric

Mathematical Correctness:

- | | | | |
|--|--|---|--|
| • Demonstrates complete understanding of the mathematical concept. | • Demonstrates adequate understanding of the mathematical concept. | • Demonstrates partial understanding of the mathematical concept. | • Demonstrates unsatisfactory understanding of the mathematical concept. |
|--|--|---|--|

Language and Vocabulary:

- | | | | |
|---|---|---|---|
| • Skillful and accurate math vocabulary is utilized within the writing. | • Adequate and appropriate use of math vocabulary is utilized within the writing. | • Vague and weak use of math vocabulary is utilized within the writing. | • Ineffective or incorrect use of math vocabulary is utilized within the writing. |
|---|---|---|---|

Organization and Fluency:

- | | | | |
|--|--|--|---|
| • Writing is easy to follow after initial reading and all the following are incorporated:
• Clarify topic in introduction
• Proper transitions are utilized
• Elaborate paragraphs with supporting details
• Appropriate word choice
• Strong concluding sentence | • Writing is generally easy to follow after one reading and most of the following are incorporated:
• Clarify topic in introduction
• Proper transitions are utilized
• Elaborate paragraphs with supporting details
• Appropriate word choice
• Strong concluding sentence | • Writing is difficult to understand after one reading and limited use of the following are incorporated:
• Clarify topic in introduction
• Proper transitions are utilized
• Elaborate paragraphs with supporting details
• Appropriate word choice
• Strong concluding sentence | • Writing is very difficult to read and understand and none of the following are incorporated:
• Clarify topic in introduction
• Proper transitions are utilized
• Elaborate paragraphs with supporting details
• Appropriate word choice
• Strong concluding sentence |
|--|--|--|---|

Explanation

- | | | | |
|---|--|---|---|
| • Writing clearly translates computational strategies into written language with very limited use of numerals with no errors. | • Writing translates computational strategies into written language with some use of numerals with few errors. | • Writing translates some computational strategies into written language with the use of numerals and few errors. | • Writing translates some computational strategies into written language with the use of numerals and few errors. |
|---|--|---|---|
